No part of this document may be reproduced or transmitted without the express written consent of the suriNotes.com or Suri Duddella.

This document relies on sources and information reasonably believed to be accurate, but neither the author nor publisher guarantees accuracy or completeness.

The examples in this document could be considered hypothetical trades.

The CFTC warns that:

HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS. SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION. HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR TO ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.

Market Quotes

"Avoiding mistakes makes people stupid and having to be right makes you obsolete."

- Robert Kiyosaki

"The test of success is not what you do when you are on top. Success is how high you bounce when you hit bottom."

- General George S. Patton

"Great spirits have always encountered violent opposition from mediocre minds."

- Albert Einstein

ALL RETURNS POSTED ON THIS PUBLICATION ARE HYPOTHETICAL PERFORMANCE GENERATED BY COMPUTERIZED SYSTEM AND THEY ARE NOT ACTUAL TRADE REPORTS. HYPOTHETICAL PERFORMANCE RESULTS HAVE MANY INHERENT LIMITATIONS, SOME OF WHICH ARE DESCRIBED BELOW. NO REPRESENTATION IS BEING MADE THAT ANY ACCOUNT WILL OR IS LIKELY TO ACHIEVE PROFITS OR LOSSES SIMILAR TO THOSE SHOWN. IN FACT, THERE ARE FREQUENTLY SHARP DIFFERENCES BETWEEN HYPOTHETICAL PERFORMANCE RESULTS AND THE ACTUAL RESULTS SUBSEQUENTLY ACHIEVED BY ANY PARTICULAR TRADING PROGRAM. ONE OF THE LIMITATIONS OF HYPOTHETICAL PERFORMANCE RESULTS IS THAT THEY ARE GENERALLY PREPARED WITH THE BENEFIT OF HINDSIGHT. IN ADDITION, HYPOTHETICAL TRADING DOES NOT INVOLVE FINANCIAL RISK, AND NO HYPOTHETICAL TRADING RECORD CAN COMPLETELY ACCOUNT FOR THE IMPACT OF FINANCIAL RISK IN ACTUAL TRADING. FOR EXAMPLE, THE ABILITY TO WITHSTAND LOSSES OR ADHERE TO A PARTICULAR TRADING PROGRAM IN SPITE OF TRADING LOSSES ARE MATERIAL POINTS WHICH CAN ALSO ADVERSELY AFFECT ACTUAL TRADING RESULTS. THERE ARE NUMEROUS OTHER FACTORS RELATED TO THE MARKETS IN GENERAL OR TO THE IMPLEMENTATION OF ANY SPECIFIC TRADING PROGRAM WHICH CANNOT BE FULLY ACCOUNTED FOR IN THE PREPARATION OF HYPOTHETICAL PERFORMANCE RESULTS AND ALL OF WHICH CAN ADVERSELY AFFECT ACTUAL TRADING RESULTS.

Trading Dragon Chart Patterns

by Suri Duddella

The Technical Analysis arena provides plenty of trading opportunities for traders in the form of patterns, cycles, and indicators. Successful pattern recognition and execution must consist of a strong framework and a well designed and tested rule based trading methodology. In this article, I would like to describe one of my favorite chart patterns called 'Dragon' with a pattern recognition framework and its trading rules.

One of the most powerful and basic pattern in Technical Analysis is 'Double Top' or 'Double Bottom.' Most traders are familiar with the concepts of 'Double Tops' and 'Double Bottoms' or 'M-Tops' and 'W-Bottoms.' However, all of these patterns have slight variations in its formations, rules and trading characteristics.

Markets rarely transition from bearish mode to bullish mode without going through a series of price action sequences to test support and resistance areas. Major market bottoms or market tops involve a series of turning points (Swing Highs in M-Tops or Swing Lows in W-Bottoms) followed by some congestion before picking a trend or counter-trend direction from prior moves. The Dragon pattern highlights these turning points (Swing Lows and Swing Highs) and provides a rule-based methodology for trading them. Dragon patterns are visible in all-time frames and all market instruments.

Dragon Framework

The Dragon (Bullish) pattern is similar to the 'W' pattern or the 'Double Bottom' pattern. Inverse Dragon patterns (Bearish) are similar to 'M' pattern. Bullish Dragon patterns usually form at market bottoms, and Bearish Dragon patterns form at the market tops. Dragon patterns work in all time frames and all market instruments. Here I will describe how a 'Bullish Dragon' is developed and traded. The rules for 'Bearish Dragon' are similar but in reverse direction.

Like most 'Double Bottom' patterns, Dragon patterns present excellent trading opportunities with great risk to reward ratios. The Dragon pattern starts with a 'Head' formation as price declines from the swing high level to a swing low to form the first leg of the Dragon. A quick reversal from this swing low (1st leg) on an attempted rally to 38-50% of prior swing forms a key swing high or 'hump' level. Another retracement from hump level forms second swing low (2nd leg). The completion of second swing low signals a potential dragon formation. These two swing lows (legs) usually form within 10-15% of the price difference. The price-action from second swing low should show key reversal bars or a divergence in any momentum based indicators. A spike in volume usually follows in the second leg. Trades are entered after completion of 2nd swing low (2nd leg) and targets are placed in the tail section of the Dragon pattern.

How to Trade a Bullish Dragon Pattern

Trade Entry

A trend line is drawn connecting the head of the Dragon to the middle swing high at hump level. After 2nd leg completion, when price closes above this trend line strong reversal price action or divergence in any momentum based oscillator indicators (like RSI), first trade entry (long) is entered. A more conservative trade long entry (second trade) is entered when price closes above the hump level.

Stop: A Stop is placed below the lowest low of two swing lows (legs).

Targets:

The first target range for a Bullish Dragon trade is set at 62-78% of swing range of head to 1st leg from the second leg level. A second target is set 100% of swing range and the third target range is set at 127-162% of the swing of the head to the 1st leg from the second leg. It may be best to trade these patterns with Trail Stops once price starts to rise towards target ranges.

Example

The following example shows Bullish Dragon formation in Monsanto (Weekly) MON chart from July 2015 to 2016. Here are some of the key points and how it is traded.

MON formed Dragon formation from October 2014 to May 2016.

MON formed a swing high to form the head of Dragon pattern (Feb. 2015)

In October 2015, MON made swing low to form Leg1 level at 84.27.

MON retraced about 43% into the prior swing to form Hump level at 100.62.

A second swing low (leg 2) was formed in March 2016.

A Trendline is drawn connecting Head and Swing High at Hump level.

Price closed above trendline to signal first long entry at 91.30 (April 2016).

A Stop was placed below the lowest low of legs.

First target is set at 62-79% (\$111-119) of head to leg1.

Second Long entry was triggered above Hump level (\$100.62).

The second target level is at \$128.5 (100%) of head to leg1.

The third target level is at \$140-156 (127-162%) of head to leg1.
